## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 1, 12-16 are objected to because of the following informalities: for example, the end of claim 1, 13 states "...if the predicted decoding method is the second decoding method, the band height is reduced to half of that in case of the first decoding method." Page 16, lines 10-16, S303, 304 of applicant's invention teaches predicting decoding method and if the predicted decoding method is the second decoding method, the band height is set or reduced to half of the band height of the first decoding method. Although the word "that" in both claims 1 and 14 appears to be referring to "band height", "that" still fails to particularly point out the subject matter. Appropriate correction is required.

Suggested language that would overcome the objection is by using: ", and if the predicted decoding method is the second decoding method, the band height is reduced to half of the band height of the first decoding method."

### ***Allowable Subject Matter***

2. Claims 1, 12-16 are allowable if amended to overcome claim objections.
